

DEAD RIVER
MANAGEMENT

More good jobs. Less guesswork.

THE HOME SERVICE
GROWTH PLAYBOOK

GET FOUND

WIN THE JOB

GROW AGAIN

Simple steps. Clear pictures.
One useful fix at a time.

YOUR STARTING POINT

Start with one fix.

You do not need to do this all at once.

Too few calls

Get found

PAGE 20

Calls, but few jobs

Handle each lead

PAGE 11

Quotes get no reply

Help people choose

PAGE 42

Few repeat jobs

Stay in touch

PAGE 46

Not sure what works

Track the job

PAGE 48

A lead is someone who asks about work. Words in {braces} are blanks to fill. All made-up numbers and screens say ILLUSTRATIVE EXAMPLE. Use the separate Detailed Reference for full setup steps.

DO THIS NOW

Pick the row that sounds like your business.

Growth is a team sport.

Each step needs a clear next step.

GET FOUND

Search, maps and useful posts

GET THE LEAD

A clear page and an easy way to ask

WIN THE JOB

Reply, book, quote and close

DO GREAT WORK

Finish, check in and ask for a review

GROW AGAIN

Stay in touch, track, fix and scale

If a step breaks, fix it before sending more people through it.

DO THIS NOW

Pick a person to own each handoff.

Where do people get stuck?

Check ten recent leads. Use all of them if you have fewer.

CHECK

OK FIX ?

Can people find us?

Check search, maps and visits.

☐☐☐

Can they reach us?

Try your phone, form and chat.

☐☐☐

Do we reply?

Look for missed calls and forms.

☐☐☐

Do they book and buy?

Check visits, quotes and lost jobs.

☐☐☐

Do they come back?

Check reviews, reminders and repeat work.

☐☐☐

Mark each row: works, needs work, or not sure. Test a broken phone or form first.

DO THIS NOW

Circle one weak spot. Make that your first fix.

02 / KNOW YOUR NUMBERS

A sale is not all profit.

You still have to pay for the work and the next job.

ILLUSTRATIVE EXAMPLE

\$1,000

PAID FOR THE JOB

- **\$600** Direct work costs
- **\$100** Cost to win the job
- **\$300** Left for bills and profit

The \$300 still has to help pay fixed bills, like rent. Track taxes, refunds and fees the same way each time.

DO THIS NOW

Check the real costs on one finished job.

Follow the people.

A reply, a booking and a paid job are not the same thing.

ILLUSTRATIVE EXAMPLE

Painting example. Two sold jobs are still not done. Do not count their quotes as money collected.

DO THIS NOW

Count each step for one group of past leads.

Know what each step costs.

Use the same spend and the same group of leads.

ILLUSTRATIVE EXAMPLE

COST PER LEAD

$$\text{\$6,000} \div 100 = \text{\$60}$$

COST PER BOOKING

$$\text{\$6,000} \div 50 = \text{\$120}$$

COST PER NEW CUSTOMER

$$\text{\$6,000} \div 16 = \text{\$375}$$

This example uses total costs to win these customers. Each of the 16 finished jobs is for a new customer. Ad spend alone is a different cost.

DO THIS NOW

Fill in your cost per lead, booking and new customer.

Start with the goal.

Then work back to the leads and budget you may need.

ILLUSTRATIVE EXAMPLE

At \$40 per lead, ad spend would be \$5,000. Add tools, fees and sales costs. Check crew space and time to get paid. This is a plan, not a forecast.

DO THIS NOW

Use your own job value and past rates.

03 / OFFER AND POSITION

Make the next step useful.

Tell people what they get when they ask for help.

WHO

Who needs this work?

PROBLEM

What do they need to fix?

OFFER

What will you do first?

PROOF

What real facts build trust?

TERMS

What costs extra? What is not included?

NEXT STEP

Call, request a visit, or get a quote?

Add real timing, service area and price terms. Use only guarantees and payment plans you can support.

DO THIS NOW

Write one clear offer for one service.

03 / OFFER AND POSITION

Show what they will get.

Clear scope helps people choose.

ILLUSTRATIVE EXAMPLE

ROOFING

A roof check

Photos, findings and repair or replacement choices.

CLEANING

A move-out clean

A room list. Clear add-ons. A written price.

LANDSCAPING

A cleanup quote

Tasks, waste removal and timing, all in one plan.

These are sample offers, not Dead River results. Do not call a visit free if any part has a fee.

DO THIS NOW

Replace a vague offer with clear tasks.

04 / FIX THE LEADS YOU HAVE

Give each lead a home.

Your CRM is your lead list. It keeps work from getting lost.

ILLUSTRATIVE EXAMPLE

Source

Where they came from

Owner

Who helps them

Status

Where the job stands

Next task

What happens, and when

Last contact

When you last spoke

Visit / value

Date and expected job value

Final result

Won, lost, done or paid

Keep sold, finished and paid as separate steps. Save the reason when a lead is lost. Full pipeline: Reference 04.

DO THIS NOW

Add one owner and one dated next task to each open lead.

No lead should sit unseen.

A form, call or chat needs a person to act.

NEW LEAD

Check for spam, repeats and service fit.

READY TO HELP

Assign an owner. Alert the team.

FIRST REPLY

Say what happens next. Use a permitted channel.

HUMAN CHECK

Did a person try to reach them on time?

If not, alert the backup. An auto-reply is not a real conversation. Promise only a response time your team can meet.

DO THIS NOW

Send a test lead. Watch it reach the right person.

Build a stop button.

The next message should fit what the person did.

Recheck the record before every send. This also applies when they book by phone or buy another way.

DO THIS NOW

Test each branch before you turn a workflow on.

Missed a call? Reach back.

Call back as soon as your team can help.

ILLUSTRATIVE EXAMPLE

TEXT TO ADAPT

Hi {first_name}, this is {name} at {business}. Sorry we missed your call. What work do you need, and what is the ZIP code? Reply STOP to stop texts.

1

Check the number and text permission.

2

Send once. Try a real callback.

3

If they reply, hand it to a person.

Skip spam, wrong numbers and duplicate requests. Do not promise an open slot you have not checked.

DO THIS NOW

Give missed calls a callback task and a backup owner.

Show that the form worked.

Say you got the request. Do not invent a booking.

ILLUSTRATIVE EXAMPLE

EMAIL TO ADAPT

Subject: Your {service} request

Hi {first_name}, we got your request. I am {name} at {business}. We will {next_step} by {real_time}. You can reply here or call {phone}.

1

Save the source and the request.

2

Assign one person to follow up.

3

Check the reply and failed-send routes.

Use only a time you can meet. A request is not a confirmed visit. Keep marketing sign-up separate when needed.

DO THIS NOW

Make one test form go from your site to your lead list.

04 / FIX THE LEADS YOU HAVE

Make the visit easy.

People should know when, where and what it costs.

ILLUSTRATIVE EXAMPLE

CONFIRMED VISIT

WHEN	{date}, {arrival_window}, {time_zone}
WHERE	{service_address}
WHAT	{visit_scope} and {fee_or_terms}
ACCESS	{gate, pet or entry needs}

REMINDER TO ADAPT

{business}: Your {service} visit is set for {date}, {window}. Please {access_step}. Need a new time? Call {phone}. Reply STOP to stop texts.

You may remind them the day before and near the visit. Stop old reminders if the time changes or the visit is canceled.

DO THIS NOW

Send the visit details and a way to change the time.

04 / FIX THE LEADS YOU HAVE

Do not lose the quote.

A sent quote still needs a next step.

ILLUSTRATIVE EXAMPLE

SEND

Explain the work, price and what is left out.

AGREE

Ask when they plan to decide.

FOLLOW UP

Use that date. Answer the next question.

FOLLOW-UP TO ADAPT

Hi {first_name}, did the {service} quote come through? I can explain the work and what is included. Would {time} suit you? {name}, {business}. Reply STOP to stop texts.

If they accept, decline, or ask you to stop, change the plan. Do not use fake deadlines to push a sale.

DO THIS NOW

Ask when they want to review the quote with you.

04 / FIX THE LEADS YOU HAVE

No reply? Use a short plan.

Keep each touch useful. Do not send forever.

ILLUSTRATIVE EXAMPLE

FIRST DAY

Try to reach them. Give a clear next step.

NEXT BUSINESS DAY

Try once more if still allowed and useful.

A FEW DAYS LATER

Ask if they still need help, then close the loop.

Hi {first_name}, do you still need help with {service}? If now is not a good time, let us know. {business}, {phone}. Reply STOP to stop texts.

A reply, booking, sale, decline or opt-out changes this plan. Long-term tips need their own permission and a useful reason.

DO THIS NOW

Set a limit and a stop rule for unanswered leads.

Missed visit? Offer a reset.

Check what happened before you mark someone as a no-show.

ILLUSTRATIVE EXAMPLE

TEXT TO ADAPT

Hi {first_name}, this is {name} at {business}. We could not complete the visit today. Would you like a new time, or has the plan changed? Reply STOP to stop texts.

1

Check for a delay, change or canceled visit.

2

Offer real open times if they still need help.

3

Save the result and stop old reminders.

If there was a service problem, give it to a person to fix. Do not send a sales message to someone waiting for help.

DO THIS NOW

Create a same-day recovery task for missed visits.

Make your map profile clear.

Your Google Business Profile helps people find and reach you.

ILLUSTRATIVE EXAMPLE

YOUR REAL BUSINESS

Use real photos of your work.

NAME	Your real business name
CATEGORY	The best match for your main work
AREA	Places you truly serve
HOURS	When customers can reach you
LINKS	Your phone, website and visit link

List real services. Add a plain description and real photos. Keep key facts the same across your site and profiles.

DO THIS NOW

Check your name, phone, hours and website today.

Keep it real. Keep it current.

Wrong details can cost you calls.

CHECK

OK FIX ?

Use the real name.

Do not add extra keywords or fake towns.

☐☐☐

Use real locations.

Do not make a fake office or extra listing.

☐☐☐

Check address rules.

Hide a home address when customers do not visit.

☐☐☐

Keep hours and photos fresh.

Show real work with permission.

☐☐☐

Test the links.

Calls and visit requests must reach your team.

☐☐☐

Use the full profile checklist in Reference 05. No one can promise the top map spot.

DO THIS NOW

Set a monthly reminder to check your profile.

Ask for honest reviews.

Give each real customer the same fair chance.

ILLUSTRATIVE EXAMPLE

ASK AFTER THE JOB

Hi {first_name}, thanks for choosing {business}. Would you share your honest review? {review_link}. All feedback is welcome. For help, call {phone}. Reply STOP to stop texts.

DO

Ask after real work. Make it easy.

DO

Use your review link or a QR code.

SKIP

Gifts, fake reviews and pressure.

SKIP

Sending only happy people to Google.

Use a permitted channel. One optional reminder is enough for this plan. Stop on a review, reply to stop, or failed delivery.

DO THIS NOW

Add a neutral review request after the job.

Reply like a real person.

Thank people. Take care of the issue.

ILLUSTRATIVE EXAMPLE

POSITIVE REVIEW

Thanks for sharing your experience. We are glad we could help with {service}. {business}

SERVICE CONCERN

We are sorry to hear about this. Please contact {name} at {phone_or_email} so we can review it and help.

These are business reply templates, not made-up reviews. Keep private details out. Do not ask for a review change as a condition of help.

DO THIS NOW

Read recent reviews for one thing your team can improve.

Give each service a page.

SEO means helping search tools find and understand your pages.

ILLUSTRATIVE EXAMPLE

● ● ●

YOUR WEBSITE

TITLE	Fence replacement in {city}
SCOPE	Removal, materials, gates and cleanup
COST	What changes the price
PROOF	Real work, real facts and real reviews
NEXT STEP	Request a site visit

Answer common questions. Link related pages. Make the page easy to use on a phone. Use clear headings and a useful page description.

DO THIS NOW

Build or improve one page for your best service.

Make each town page useful.

A new city name alone does not make a useful page.

ILLUSTRATIVE EXAMPLE

THIN PAGE

Swap the city name.

Repeat the same text.

Claim an office that is not there.

USEFUL PAGE

Show the real area served.

Explain local access and timing.

Use real local work and questions.

Do not invent jobs or offices. If two pages do the same job, one strong page may be better.

DO THIS NOW

Check one town page. Add a real reason for it to exist.

Help search find the page.

Good content must also be easy to open and use.

1

Test the page

Does it load? Do the links and form work?

2

Check search access

Use Search Console to inspect the page.

3

Link it

Add a link from a useful related page.

4

Keep it useful

Fix old facts. Merge weak repeat pages with care.

Search Console is Google's free site-check tool. Ask your web team to check indexing, the sitemap and site code. Full steps: Reference 07.

DO THIS NOW

Open your main service page on your phone.

Answer what people ask.

Clear answers help people, search tools and AI tools.

ILLUSTRATIVE EXAMPLE

How much is a new water heater?

The full price depends on the heater, access and work needed. Ask if removal, parts, permits and changes to the home are in the quote.

ASK

Get the facts from the person who does the work.

WRITE

Give the short answer first.

CHECK

Use real facts. Show what may change the answer.

Add local prices only when you can support them. Clear content can help discovery. It cannot promise an AI mention or ranking.

DO THIS NOW

Write down five questions your customers ask often.

Use one answer three ways.

You do not need to post on every site.

WEBSITE

A clear answer with the next step.

SHORT VIDEO

A team member explains it in plain words.

FOLLOW-UP

Send it when a customer asks the same thing.

QUESTIONS TO TRY

Should I fix or replace my AC?

Why is my AC not cooling?

How much is a new AC?

How long does a roof last?

Use AI to help draft, not to invent facts. A skilled person should check the answer. Keep your name, services and area clear everywhere.

DO THIS NOW

Pick one question. Turn the answer into a page and a short clip.

Help them choose you.

The page should match the promise that brought them there.

ILLUSTRATIVE EXAMPLE

Clear at the top

Show the work, area and next step.

Real reasons to trust

Use proof you can back up.

Easy to act

Make the call or form easy to find.

Put a working phone link where it is easy to find. Show only real licenses, terms and payment plans.

DO THIS NOW

Match one ad or search result to the page it opens.

Make asking for help easy.

A short form should collect what the team needs next.

ILLUSTRATIVE EXAMPLE

● ● ● YOUR WEBSITE

Request a quote

Name

Phone or email

Property ZIP code

Service needed

Send request

1

Ask only what helps you route the job.

2

Keep field labels clear.

3

Show that the request went through.

4

Say who will reply and when.

Chat should help with the same next step. If it is AI, say so. Never invent a price or an open slot.

DO THIS NOW

Fill out your own form on a phone.

Pick one job and one channel.

Start where your next customer is most likely to act.

GOOGLE

They search for help.

Example: "drain clearing near me"

Works with a need they already have.

META

They see a useful idea.

Example: a spring yard cleanup post.

Helps people notice a need or plan work.

Keep the same goal: finished work you can earn money on. Full campaign setup stays in Reference 10.

DO THIS NOW

Choose one service, one area and a budget you can afford.

Google: start with the job.

Choose work you can do well and profitably.

ILLUSTRATIVE EXAMPLE

Start with clear, high-intent searches. Exact match can include close variants. Check actual searches and block ones that do not fit.

DO THIS NOW

List a few searches that show a real need for your service.

Keep the account simple.

Group related searches with the right ad and page.

ILLUSTRATIVE EXAMPLE

Separate budgets when services, areas or job costs need different control. Do not split a small budget into lots of tiny campaigns.

DO THIS NOW

Draw your first campaign before building it.

Write an ad that fits.

Be clear about the service, place and next step.

ILLUSTRATIVE EXAMPLE

● ● ● YOUR WEBSITE

example.com / drain-clearing

Drain Clearing in {City}

See what the visit includes. Ask about service in your area.
Call {business} or request a visit.

SERVICE

Say what work you do.

TRUST

Use facts you can prove.

ACTION

Tell them what happens next.

Do not claim "open now," "same day," or "free" unless it is true. A click on the phone link is not a completed call.

DO THIS NOW

Read the ad and page together. Do they promise the same thing?

Check before you spend.

Start with a working path from search to real help.

CHECK

OK FIX ?

Area and hours are right.

Match where and when you can help.

☐☐☐

The ad opens the right page.

Keep service and offer terms the same.

☐☐☐

The budget has a limit.

Know your total test cost.

☐☐☐

The lead has an owner.

Test alerts, replies and backup coverage.

☐☐☐

Job results can be tracked.

Record good leads, bookings and finished jobs.

☐☐☐

Pick bids based on sound lead data and your job costs. Do not raise bids just to spend the budget or take the top spot.

DO THIS NOW

Test one call and one form all the way to your lead list.

Fix the first weak step.

Use the result to choose the next move.

Keep useful lead and job data. Scale only when costs, staff time and cash support it. A top ad spot is not the goal.

DO THIS NOW

Change one weak step. Give it time to show a result.

Meta: show something useful.

Use real work and plain words that fit the homeowner's need.

ILLUSTRATIVE EXAMPLE

Your company

USE A REAL PHOTO HERE

What does a move-out clean include?

A room list helps you compare quotes. Check floors, kitchen tasks and bath tasks. Ask what costs extra before you book.

REAL PHOTO

Use an approved team or work photo.

CLEAR COPY

Name the service and the useful next step.

MATCHING PAGE

Keep the same offer after the click.

This drawing is not job proof. Use genuine photos with permission. No fake reviews, stories or "news" claims.

DO THIS NOW

Make one ad from a real customer question.

Ask Meta for the right result.

The goal is a useful lead, not just a cheap click.

1

Choose leads

Use the goal that fits a service inquiry.

2

Set the real area

Stay inside the area your crew can serve.

3

Pick the lead path

Use a tested website form or an in-app form.

4

Connect the reply

Send each lead to an owner in your CRM.

Start with a small set of clear ads. Check which settings are firm limits and which are suggestions. Full setup: Reference 10, Meta.

DO THIS NOW

Build one simple lead campaign for one service.

Test a few clear ideas.

A small budget needs a small test.

ILLUSTRATIVE EXAMPLE

AD A

Show the tasks in the service.

AD B

Answer a common price question.

KEEP THESE THE SAME

Offer

Service area

Landing page

Lead goal

Keep the offer, area, page and goal the same. An ad with little spend is untested, not proven bad. Do not pause a working main ad just to force a test.

DO THIS NOW

Write the test limit and decision date before launch.

Cheap leads can cost more.

Look at what became finished work.

ILLUSTRATIVE EXAMPLE

AD A

\$500

Spend

30

Leads

1

Finished new customer

\$500

Cost per new customer

AD B

\$600

Spend

15

Leads

6

Finished new customers

\$100

Cost per new customer

These are made-up results from two finished lead groups. Check job value, work costs and staff time too. More leads does not always mean more profit.

DO THIS NOW

Compare cost per finished new customer, not just cost per lead.

Do not judge one bad day.

Check the whole path before changing the ad.

Allow time for people to decide and jobs to finish. Fix broken links or bad claims right away. Keep testing within a set budget.

DO THIS NOW

Check the cause, then test one change.

Make the call feel easy.

Listen first. Then guide the next step.

ILLUSTRATIVE EXAMPLE

WELCOME

Thanks for calling {business}. How can we help?

CHECK FIT

What work do you need? What is the property ZIP?

EXPLAIN

The visit includes {scope}. The fee or terms are {terms}.

BOOK

We have {real_slots}. Which time works?

Confirm the address, access, date and arrival window. If you cannot help, say so. Do not promise a time that is not open.

DO THIS NOW

Practice this with the person who answers your calls.

Help them compare.

A clear answer is better than pressure.

ILLUSTRATIVE EXAMPLE

"The price is too high."

Is it above your budget, or above another quote? Let's compare what is included.

"We need to think."

Of course. What would help you decide: scope, timing or price?

"We are getting quotes."

That makes sense. I can send our scope and key terms so the comparison is fair.

Agree on a useful follow-up time. Save the reason if they choose not to buy. Do not shame them or make up urgency.

DO THIS NOW

Ask one calm question before you defend the price.

Start with the right group.

Old records need a check before a new message.

OLD QUOTES

Ask if the project is still planned.

PAST CUSTOMERS

Offer a service they may be due for.

MISSED VISITS

Offer a new time if still useful.

SEASONAL WORK

Ask about the next useful service.

Remove wrong numbers, opt-outs and repeat records. Check channel permission. Skip active jobs and open service complaints. Do not blast the whole list.

DO THIS NOW

Choose one small group with a real reason to hear from you.

12 / BRING PEOPLE BACK

Send a useful check-in.

A specific reason beats a vague sales push.

ILLUSTRATIVE EXAMPLE

SEASONAL CLEANUP TEXT

Hi {first_name}, this is {name} at {business}. Are you planning a yard cleanup this season? We can quote {real_scope}. Would you like a time to look at it? Reply STOP to stop texts.

YES

Ask about the work and offer real times.

LATER

Save the date they ask for.

NO / STOP

Close the sales task or stop messages.

For old quotes, first ask if the work is still needed. Confirm current scope and price. More campaign scripts are in Reference 12.

DO THIS NOW

Try a small group first. Track replies, jobs and costs.

The next job starts here.

Good follow-through gives people a reason to return.

FINISH WELL

Explain the work and care steps.

CHECK IN

Make sure the handoff was clear.

ASK FOR A REVIEW

Invite honest feedback.

REMIND

Use a real service need and a permitted channel.

EARN THE NEXT JOB

Offer a useful plan, related service or referral link.

Handle service issues first. Offer extra work only when it fits. Do not add a referred person to a text list without permission.

DO THIS NOW

Put the next useful service date on each customer record.

Make plans easy to understand.

A plan must work for the customer and your team.

ILLUSTRATIVE EXAMPLE

WHAT

List the work and what is not included.

WHEN

Set the visit count and service schedule.

PRICE

State fees, renewal and cancel terms.

DELIVERY

Make sure the crew can do the work.

\$1,800

Yearly plan revenue

- \$1,200

Service and care costs

= \$600

Before sales costs and fixed bills

Pool-service teaching example. Track visits used, repeat work and people who leave. Future payments are not cash in the bank.

DO THIS NOW

Write the tasks, dates, price and terms before you sell a plan.

Connect the lead to the job.

Keep one job ID from the first request to the paid bill.

ILLUSTRATIVE EXAMPLE

Keep repeat requests about the same job together. A click, a form and a call may be one lead. Two ad tools may claim the same sale.

DO THIS NOW

Pick one finished job. Trace it back to its source.

Use each tool for its job.

Your job and payment records show what the business earned.

GA4

→ What people do on your site.

SEARCH CONSOLE

→ How people find your site in Google.

CALL + FORM
TRACKING

→ Which path brought the request.

CRM + JOB RECORDS

→ Who booked, bought and finished.

PAYMENT RECORDS

→ What was paid and what it cost.

Use named links called UTMs to label sources. Keep names, emails and phone numbers out of ordinary analytics fields and page URLs. Detailed setup: Reference 14.

DO THIS NOW

Check that a test form reaches tracking and your CRM once.

Check the week. Pick one fix.

Look at business results, then decide what to do.

New leads

People reached

Visits booked / kept

Quotes sent / won

Jobs finished

Money collected

Work + marketing costs

What brought
good jobs?

Where did people
get stuck?

Which one
change comes
next?

Allow time for recent leads to turn into jobs. Do not compare unfinished groups with finished ones. Count repeat customers separately.

DO THIS NOW

Write one next action, one owner and one due date.

Build it in three steps.

Do the next phase when the first one works.

DAYS 1-30

FIX THE BASICS

Test tracking and lead routing.

Fix calls, forms and follow-up.

Clean up the offer, site and profile.

DAYS 31-60

GET MORE GOOD LEADS

Build useful service pages.

Ask for honest reviews.

Run one funded ad test.

DAYS 61-90

KEEP WHAT WORKS

Reach the right past customers.

Add service reminders.

Review jobs, costs and crew space.

Do not raise spend just because the date changed. Scale when the full path works and your crew can deliver.

DO THIS NOW

Start with the first phase. Put the work on the calendar.

Your first week.

One small task each day gets the system moving.

DAY 1

Check ten leads. Find the first leak.

DAY 2

Test the phone, form and chat.

DAY 3

Give each open lead an owner and task.

DAY 4

Review old quotes and reply to open leads.

DAY 5

Check one finished job's revenue and costs.

Fix a broken contact path right away. Use the full 90-day checklist in Reference 16 and 17 when you are ready.

DO THIS NOW

Choose the day you will start.

Your one-fix worksheet.

Use this page to turn an idea into a task.

The service we want to grow

The step where people get stuck

What the records show

One change we will make

Who owns it, and the due date

What we will count to check it

Use a clear task: "Fix the form alert by Friday." Then test it. Save what changed and what you learned.

DO THIS NOW

Fill this out with the person who owns the work.

Your numbers worksheet.

Use one service and one time period.

Money from finished jobs ÷ finished jobs

Revenue minus direct job costs

Cost to win leads ÷ number of leads

Same cost ÷ number of bookings

Same cost ÷ new customers with finished jobs

Next month's job goal and crew space

The full blank worksheets, call scripts, emails and workflow rules are in the Detailed Reference and Implementation Toolkit.

DO THIS NOW

Use real numbers. Write "not sure" when you do not know.

YOUR NEXT STEP

You have the playbook.

Start with one fix. Build from there.

DO IT WITH YOUR TEAM

Use the worksheets. Fix one handoff at a time.

BUILD IT WITH DEAD RIVER

We can build and run the system with you.

Get your Growth Plan

Get your Growth Plan at deadrivermanagement.com/growth-plan. Brandon:
brandon@deadrivermanagement.com | (915) 228-3054.

DO THIS NOW

Keep one promise: give each customer a clear next step.
